

MAGNESIUM BIS GLYCINATE

Benefits

- Magnesium amino acid chelate
- Approved by EFSA
- Highly bioavailable
- Reduced nutrient interactions
- Complies EU regulations for Heavy metals

Technical information

- Appearance - White to off-white crystalline powder
- Magnesium content - 11% – 12%

Microbiology

- Total aerobic count - Max 1000cfu/g
- Total yeast & mold - Max 100cfu/g
- E-coli - Absent
- Salmonella - Absent

Applications

- Snack bars
- Sports drink
- Breakfast cereals
- Chewing gum
- Food supplements
- Tablets
- Capsules

Physical properties

- Moisture content - Max 20%
- Shelf life - 3 years

Labeling & EU approved

- Labeled as Magnesium glycinate or Magnesium bis glycinate.
- Approved under EFSA for use as direct food additive
